

Dairy for Better Nutrition

Company Profile

Blue Lake Dairy Group was established in 2015 in the pristine clean heart of the Green Triangle agricultural region in the South East of South Australia.

Our state of the art plant specialises in developing market ready milk powder products for local and overseas markets.

The Blue Lake Dairy Group plant is the first and only milk powder packing plant in South Australia. It is one of the most technologically advanced milk powder packing plant in Australia.

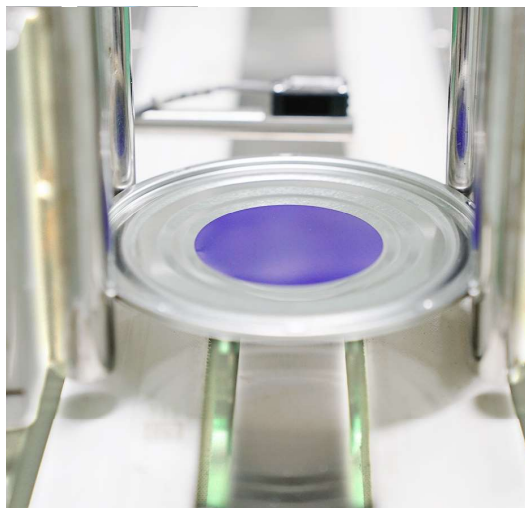

Our fully integrated and computerised quality assurance system carefully monitors ingredients and production at all stages of manufacture to ensure a finished product of the highest standard.

The Blue Lake Dairy Group plant is fully compliant with all Australian government quality standards and regulations and is a fully certified and registered Australian milk powder manufacturing premises.

Our quality assurance system extends from the procurement of raw materials right through to the delivery of the finished product to the client. Milk powder raw materials are sourced locally from clean and green Australian suppliers.

The Blue Lake Dairy Group has invested heavily in research and development to deliver many new and innovative products that meet the constantly changing needs of our customers and help them stay in the forefront of competitive markets.

Today, the Blue Lake Dairy Group has successfully passed many milestones and is well on its way to achieving its mission of becoming one of Australia's leading suppliers of sophisticated and high quality milk powder products. We pride ourselves on providing personalised customer service and always seek to deliver value to our clients.

Factory Highlight

Blue Lake Dairy Group is situated at Tantanoola in the state of South Australia. This location is approximately 410kms southeast of Adelaide, South Australia, and 450kms west of Melbourne, Victoria. Blue Lake Dairy sits in the area known as the Green Triangle in recognition of its fertile grasslands.

The factory is located on 406,000 m² of land, of which the office area and the production plant is about 5,500 m², and about 4,000 m² of insulated warehouse area.

Annual Production Capacity

20,000
tons

"We produce 20,000 tons of milk powder every year"

That is approximately

22,220,000

tins of baby formula (900g/tin)

20,000,000

bags of milk powder(1kg/bag)

500,000,000

sachets of milk powder (40g/sachet)

The Advantages of Factory Layout, Size, Production Line & Management

1. The factory design and layout not only meets the Australian dairy industry standards, but is also designed in accordance with high standards set by the Chinese infant milk powder industry.
2. The factory's GMP clean zone is around 1,000 square meters. With this area and the quasi clean room, raw materials storage, finished products storage, insulated warehouses etc, the factory is almost the largest milk powder packaging facility in Australia.

3. The packaging production lines have the most advanced auto packing machines in Australia. As such, it can produce:

- Cans (400 - 1000g) with either high or flat caps;
- Bags (400-1000g); and
- Sachets (25 - 40g).

4. Blue Lake Dairy Group's factory senior management team has more than 20 years of experience in the dairy industry, making it one of the most qualified management teams in the Australian dairy industry. The senior management team are all from large Chinese dairy companies and have many years experience of on-site management and operations. The Research and Development team are also professionals in the industry with significant experience. They have worked in national dairy research and development and for major dairy manufactures in China.

QUALITY MANAGEMENT SYSTEM

Our products are 100% derived from Australia. The sourcing of all milk and nutritional ingredients is under strict control and is fully traceable.

Dry processing and modern production equipment can ensure the safety, quality, hygiene, and nutrition of all milk powder products processed at Blue Lake Dairy Group.

Blue Lake Dairy Group has a sound quality management system:

INFANT FORMULA

Breast milk is the best nutrition for babies. However when sometimes breastfeeding is not possible for some new mothers or breast milk is not enough, our range of nutritional infant formula products provides a safe reliable alternative for mothers.

Biomilk is offering baby the best nutrition with essential fatty acids (e.g. DHA, ARA, Nucleotides), vitamins and minerals to support natural brain and eye development, and the natural development of a healthy immune system.

It is made from 100% Australian cow's milk. Milk powder raw materials are sourced locally from clean and green Australian suppliers located in the pristine clean heart of the Green Triangle agricultural region in the South Australia. It is produced in accordance with Australia food guidelines and standards, such as Australia New Zealand Food Standards Code, EXPORT CONTROL (MILK AND MILK PRODUCTS) ORDERS 2005 and HALAL.

The Blue Lake Dairy plant is located in the heart of the pristine Green Triangle Grasslands dairy region of South Australia. All dairy cows in this region graze free range in open pastures, are GMO free and produce their milk while living on a diet of grass - as nature intended.
